## SNOW THROWERS

### EASY TO START

The Jonsered engines are easy to start even in extremely cold conditions. Two of our models are also fitted with electric starter making them even easier to start.

### POWER STEERING

The "power steering" gives the possibility of disengaging the drive for one or both wheels making the thrower much easier to turn and maneuver.

### SAFE GRIP

Deep tread on the tires and differential lock means a safer grip.

## POWERFUL, DURABLE SNOW THROWERS.

This new range of snow throwers from Jonsered is designed for clearing large volumes of snow from large driveways and paths, regardless of surface type. The durable heavy-duty design and powerful engines ensure arctic reliability and minimal service

requirements, while the two-stage system provides high throwing capacity in all snow conditions. The two bigger models come with power steering, flood headlights and electric starter as standard equipment. The single-stage unit is designed for walkways, patios and decks.

## Invented for life

### 1" SDS-plus® Bulldog™ Extreme Rotary Hammer

The fastest, longest lasting breed of rotary hammer, the totally redesigned bulldog extreme outlasts the competition in both speed and performance! Multi-function selector has 3 modes of operation: rotary hammer, hammer-only and rotation-only mode. Dariolock positioning rotates and locks chisel into 36 different positions to optimize working angle. The innovative rotating brush plate provides equal power in forward and reverse. Cord turret has a 35-degree pivot for added flexibility and longer cord life. SDS-plus® bit system tool-free bit changes with automatic bit locking, dust protection and maximum impact energy transfer rate. Variable-speed reversing trigger for accurate bit starting as well as removing fasteners or bound bits. Integral clutch helps minimize torque reaction. The 1125VSR has a comfortable D-handle grip design for greater control, especially when drilling overhead or downward.

### Brute™ Breaker Hammer with Basic Cart

The Bosch BH2760VC Brute™ Breaker Hammer delivers the best concrete removal rate in its class, impressive for a tool that weighs just 63 lbs. Providing 1,000 BPM and 43 ft.-lbs. of impact energy, this tool can handle heavy-duty applications such as asphalt work or foundation removal.

The Vibration Control™ system includes a longer air cushion in the hammer mechanism and shock-mounted handles. The breaker hammer doesn't need a compressor, running on any 115/120V AC/DC, 15-AMP outlet or 2,500-watt portable generator. The tool employs Bosch's Service Minder™ brushes, which stops the tool when preventative maintenance is needed. For longer tool life and better return on investment, it delivers a greasepacked gearbox and hammer mechanism, a heat-dissipating hammer tube and rubberized nonslip housing cover that helps to prevent accidental fall-over.
